DEPARTMENT
Physical Medicine &
Rehabilitation

CLINICAL FOCUS

A significant part of Ceren Keser's practice involves movement disorders treatment. Patients with movement-related difficulties are assessed in terms of their functional abilities, mobility and everyday limitations, and rehabilitation is planned around the individual condition and the patient's own functional goals.

She also works with patients who have sports injuries and knee injuries, where rehabilitation may address pain, range of motion, strength and the return to daily or athletic activity. Frozen shoulder syndrome is another condition within her area of expertise;

INTERNATIONAL PATIENTS

Ceren Keser speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, operative notes and discharge summaries, and arranges appointments and the organization of the hospital visit.
