Psychiatry & Psychology

CLINICAL FOCUS

Dr. Özgündüz's areas of expertise include obsessive-compulsive disorder, anxiety disorders, major depression and bipolar disorder. She also assesses and treats atypical psychosis and hyperactivity.

Sleep disorders form a further part of her work, including insomnia and sleep apnea; the use of melatonin is among her listed areas of interest. Treatment plans are drawn up individually after a psychiatric assessment, and the approach depends on the diagnosis, the patient's history and any previous treatments.
