CLINICAL FOCUS

Dr. Perçinoğlu's work covers a range of gynecological, urogynecological and obstetric conditions. In the area of pelvic health she sees patients with endometriosis, pelvic pain and dysfunction, painful intercourse and menstrual irregularities. Her urogynecological practice focuses on urinary incontinence and bladder health, and she also performs vaginal tightening procedures.

Whether a particular treatment is appropriate depends on the individual patient's history, examination findings and test results, which are reviewed together with the patient before any plan is discussed.

Endometriosis treatment

Vaginal tightening

Menstrual irregularities

Pelvic pain and dysfunction

Painful intercourse

INTERNATIONAL PATIENTS

Dr. Perçinoğlu speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Menstrual irregularities

Pelvic pain and dysfunction

Painful intercourse
