DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Kalafat's clinical work covers both gynecology and obstetrics. In gynecology, she assesses and treats menopause-related symptoms, premenstrual syndrome (PMS), HPV and polycystic ovary syndrome.

Because conditions such as endometriosis, polycystic ovary syndrome and menopause can affect several aspects of a woman's health, the assessment usually takes into account the patient's symptoms, examination findings, imaging and any previous treatment before options are discussed.
