CLINICAL FOCUS

Dr. Göçmez evaluates and treats conditions affecting the brain, the pituitary gland, the spine and the spinal cord. His areas of expertise include brain tumors, pediatric brain tumors and pituitary disorders. In pediatric neurosurgery, he assesses children with neurosurgical conditions and discusses the possible approaches with families.

A further part of his practice is spinal surgery. He sees patients with cervical and lumbar disc herniation, cervical spinal canal stenosis and lumbar spinal canal stenosis, as well as spine and spinal cord tumors. Whether surgery is appropriate, and which technique may be considered, depends on the individual findings, symptoms and imaging, and is decided after a clinical assessment.

Cervical and lumbar disc herniation

Pituitary disorders

INTERNATIONAL PATIENTS

Dr. Göçmez consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments and organises the hospital visit.
