DEPARTMENT
Anesthesiology &
Reanimation

CLINICAL FOCUS

Dr. Akçora's work centers on anesthesiology and reanimation across the perioperative period: assessing patients before an operation, planning and administering anesthesia, monitoring the patient during the procedure and overseeing the early recovery phase.

She also has expertise in regional anesthesia, in which a specific region of the body is anesthetized as part of the overall anesthetic plan, and in intensive care and reanimation, which involve the monitoring and support of critically ill patients.
