CLINICAL FOCUS

Dr. Atasoy's practice covers a broad range of general surgical conditions. In the anorectal field he assesses and treats hemorrhoids, anal fissure and other anorectal diseases. He performs colorectal surgery, including surgery for colorectal cancer, and uses robotic surgery where it is considered appropriate for the individual patient.

He also treats inguinal hernia and umbilical hernia, and performs thyroid surgery and mastectomy. Whether surgery is advisable, and which approach is suitable, is decided after clinical assessment and review of the available findings, and depends on the diagnosis and the patient's overall condition.

Anal fissure Umbilical hernia Hemorrhoids and anorectal diseases
Inguinal hernia Colorectal surgery

CONDITIONS TREATED

Anal fissure Umbilical hernia Hemorrhoids and anorectal diseases
Inguinal hernia Cholecystitis
