## CLINICAL FOCUS

Dr. Turgut's areas of expertise are endodontics, dental pulp conditions and root canal treatment. Dental pulp conditions include inflammation or infection of the soft tissue inside the tooth, which may present with pain, sensitivity to temperature, swelling or discomfort when biting. In some cases the pulp is affected without obvious symptoms and is identified during a routine examination or on dental imaging.

Root canal treatment is the procedure most closely associated with endodontics. It involves removing the affected pulp tissue, cleaning and shaping the root canal system and sealing it so that the natural tooth can be retained. Dr. Turgut reviews each case individually, taking into account the condition of the tooth, the surrounding bone and the patient's general dental health before discussing whether root canal treatment or...

## INTERNATIONAL PATIENTS

Dr. Turgut consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior dental reports and imaging, such as X-ray reports and notes from previous treatments, and arranges appointments and the hospital visit.
