Neurology

CLINICAL FOCUS

A central part of Dr. Kaya's practice is the treatment and prevention of stroke, including the evaluation of patients with cerebrovascular disease and the planning of preventive treatment. He also treats headache disorders, including migraine, and performs nerve blocks as part of headache management.

In the field of neurodegenerative and age-related conditions, Dr. Kaya sees patients with dementia, Alzheimer's disease and Parkinson's disease, as well as other movement disorders. He also evaluates and treats multiple sclerosis, myasthenia gravis, ALS and other muscle and nerve diseases, and patients with sleep disorders.
