CLINICAL FOCUS

Dr. Özturan's clinical work covers a broad range of ear, nose, throat, and head and neck conditions. In the field of oncology, he treats head and neck cancers and performs head and neck reconstructive surgery, an area in which he received dedicated training.

He also evaluates and treats patients with vertigo and balance disorders, tinnitus, snoring, and hoarseness, and performs tonsil surgery. Whether medical management or a surgical procedure is appropriate depends on the individual patient's findings, and the options are discussed with the patient after examination.

Head and neck cancers
