Pediatrics

CLINICAL FOCUS

A significant part of Dr. Çoban's work involves the general health of children and adolescents, from the newborn period onward. She provides well-child follow-up, in which growth, development, and general health are reviewed at regular intervals, and she evaluates developmental disorders in children when concerns arise.

Dr. Çoban also evaluates and treats iron deficiency and anemia in children, which may be identified through routine follow-up or after symptoms are noticed by parents. In addition, she assesses children with infectious diseases seen in pediatric practice, including scarlet fever, rubella, and measles.
