CLINICAL FOCUS

Dr. Çeşme's areas of expertise cover the main cross-sectional and projectional imaging methods used in diagnostic radiology. She reports magnetic resonance imaging (MRI) and computed tomography (CT) examinations, as well as conventional X-ray imaging.

Her research interests, reflected in her publications, include diffusion tensor imaging of the brain in tuberous sclerosis and neurofibromatosis type-1, imaging of cervical spinal trauma, and the use of Doppler ultrasound and magnetic resonance angiography in the assessment of vertigo.
