CLINICAL FOCUS

Dr. Çamlı's practice is dedicated to diagnostic radiology. She performs and interprets MRI examinations, which use magnetic fields rather than ionizing radiation to produce detailed images of soft tissues, joints, the brain and other organs.

A further area of her work is virtual angiography, an imaging approach in which blood vessels are visualized from cross-sectional data sets without a conventional catheter-based procedure. In each of these areas, the choice of imaging method depends on the clinical question, the patient's history and any previous examinations. Dr.

INTERNATIONAL PATIENTS

Dr. Çamlı speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
