CLINICAL FOCUS

Dr. Öncü's areas of expertise include newborn follow-up and child and adolescent health, with assessment of growth and developmental disorders in children. He evaluates and manages pediatric infectious diseases, including upper respiratory tract infections in children, and addresses pediatric nutrition disorders, iron deficiency and anemia in children, lactose intolerance in...

He also sees children with gastrointestinal and urinary complaints, including constipation in children, hematuria in children, and urinary incontinence in children. Care is planned according to the child's age, symptoms, and clinical findings, and follow-up is arranged as needed.

INTERNATIONAL PATIENTS

Dr. Öncü speaks Turkish and English, and interpreters can be arranged for families who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging—for example ultrasound or X-ray reports, laboratory results, and discharge summaries—arranges appointments, and organizes the...
