CLINICAL FOCUS

Intensive care treatment is the core of Dr. Özdemir's practice. Patients admitted to an intensive care unit typically require close monitoring of breathing, circulation and organ function, together with treatment that is adjusted as their condition changes.

Advanced life support forms another part of his work. This refers to the structured measures used when a patient's heart or breathing is failing or has stopped, and to the stabilization that follows. Dr. Özdemir also provides palliative care, which focuses on relieving symptoms and maintaining comfort for patients with serious illness.
