Dental & Oral Health

CLINICAL FOCUS

Dr. Karadeniz treats the range of conditions covered by periodontology. These include gum disease in its different stages, gum bleeding, gum abscesses and gum recession. She also manages mouth sores and oral malodour, which can be linked to the condition of the gums and the presence of bacterial deposits.

A particular area of her work is the treatment of peri-implantitis, an inflammatory condition affecting the bone and soft tissues around dental implants. She also performs laser gum treatment, which may be considered for selected periodontal problems depending on the clinical situation. In addition, Dr.

INTERNATIONAL PATIENTS

Dr. Karadeniz consults in Turkish and English, and interpreters can be arranged for other languages. For patients traveling from abroad, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT reports, laboratory results and records of previous treatments, and arranges appointments and the hospital visit.
