Physical Medicine & Rehabilitation

CLINICAL FOCUS

Ebru Uzun Saral's areas of expertise are physical rehabilitation and lymphedema treatment. Lymphedema is a chronic swelling condition, and its management is generally a long-term process that depends on the individual patient's presentation, the stage of the condition and any accompanying medical treatment. Her role as a physiotherapist is to assess the patient and to deliver and adjust a rehabilitation plan over time;

Beyond lymphedema, she provides physical rehabilitation for patients who require physiotherapy as part of their recovery. Rehabilitation programs are typically planned in coordination with the treating physicians and are tailored to the patient's functional goals, general health and tolerance for exercise. Progress is reviewed at intervals and the program is adapted as the patient's condition changes.
