CLINICAL FOCUS

A central part of Dr. Eren's practice is endometriosis, a condition she studied further during her fellowship program in Italy. She evaluates women with symptoms that may be related to endometriosis, reviews any existing imaging and previous treatments, and discusses the options that may be appropriate for the individual patient.

Within urogynecology, Dr. Eren sees women with pelvic floor and urinary complaints and considers both conservative and other management options according to the findings. She also provides sexual dysfunction treatment, approaching these concerns in a clinical setting with attention to the patient's history, symptoms and overall gynecologic health.

INTERNATIONAL PATIENTS

Dr. Eren consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
