CLINICAL FOCUS

In medical dermatology, Dr. Ertürk evaluates and treats inflammatory and pigmentary skin conditions. These include rosacea, psoriasis, vitiligo and other pigmentation disorders, as well as birthmarks. Her work also covers the evaluation of skin tumours, including the assessment of suspicious lesions and malignant melanoma.

In cosmetic dermatology, her areas of expertise include botulinum toxin applications, gold needle treatment, fractional laser treatment, and procedures aimed at skin rejuvenation and regeneration. Whether a procedure is appropriate depends on the individual patient's skin type, medical background and clinical findings, and Dr.

Botulinum toxin applications

Gold needle treatment

Skin rejuvenation and regeneration

Fractional laser treatment

Rosacea

INTERNATIONAL PATIENTS

Dr. Ertürk consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before the visit, the international patient team coordinates the collection of prior reports and imaging, such as pathology results, laboratory findings, previous dermatology reports, clinical photographs where available, and any operative notes or discharge summaries,...
