Hospital, İstanbul

DEPARTMENT
Pediatrics

CLINICAL FOCUS

Dr. Albayrak's practice covers general child and adolescent health with an emphasis on preventive care. This includes routine preventive child health follow-up, childhood vaccinations, and monitoring of growth and nutrition, including the follow-up of childhood nutritional disorders.

Newborn care is a further area of her work. She follows newborns in the first weeks of life, interprets newborn screening tests, and evaluates newborn jaundice and infant colic. Where a child's condition requires input from another specialty, the assessment is coordinated within the hospital's pediatric and related departments.

Childhood rash illnesses

Preventive child health follow-up

Childhood vaccinations

Child and adolescent health

Iron deficiency and anemia in children

CONDITIONS TREATED

Childhood rash illnesses

Upper respiratory tract infections in children

Childhood vaccinations

Iron deficiency and anemia in children

Infant colic
