CLINICAL FOCUS

Dr. Özdemir's main area of practice is prosthetic dental treatment. This covers the planning and provision of prosthodontic restorations for patients who have lost one or more teeth or whose teeth are damaged. Restorative dentistry is a further part of her work, and her research interest in the color stability of CAD/CAM fabricated inlays reflects this focus on how restorations...

A second area of her work is implantology, including the process of osseointegration, in which a dental implant integrates with the surrounding bone. Dr. Özdemir is a member of the International Team for Implantology (ITI) and the European Association of Osseointegration (EAO).

INTERNATIONAL PATIENTS

Dr. Özdemir speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT reports, previous treatment records and laboratory results, and arranges appointments...
