DEPARTMENT
Radiology

CLINICAL FOCUS

Dr. Agolli's areas of expertise include interventional radiology, tomography and ultrasonographic imaging. On the diagnostic side, this involves acquiring and interpreting cross-sectional and ultrasound studies and correlating the findings with the patient's history and previous examinations, so that the referring team has a clear basis for further decisions.

On the interventional side, his expertise includes transarterial radioembolization (TARE), a catheter-based procedure performed under imaging guidance in which treatment is delivered through the arterial system. Whether a patient is a candidate for TARE or for any other interventional radiology procedure depends on the individual clinical situation, the findings on imaging and the assessment of the treating team, and this is...

INTERNATIONAL PATIENTS

Dr. Agolli speaks Turkish and English, and interpreters can be arranged for patients who need them. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and organises the...
