CLINICAL FOCUS

Dr. Avşaroğlu sees women with a range of gynecological and reproductive concerns. In reproductive medicine she evaluates fertility and infertility, including low ovarian reserve as reflected by AMH, and her training in assisted reproductive techniques informs this part of her practice.

A second focus is the menopausal transition and the pelvic floor. Dr. Avşaroğlu assesses and treats urinary incontinence and other bladder health concerns, drawing on her urogynecology observership, and she provides care for women experiencing menopause. Genital aesthetics is also among her areas of expertise.

Low ovarian reserve (AMH)

Menopause

HPV

Genital aesthetics

Menstrual irregularities

CONDITIONS TREATED

Low ovarian reserve (AMH)

Menopause

HPV

Menstrual irregularities

Polycystic ovary syndrome
