DEPARTMENT
Dermatology

CLINICAL FOCUS

Dr. Durmaz evaluates and treats a range of chronic and inflammatory skin conditions. Her areas of expertise include psoriasis, urticaria and dermatomyositis, a condition in which skin findings may be accompanied by muscle involvement and which often requires coordinated follow-up.

Her procedural work includes cryotherapy, fractional laser treatment and the assessment and management of dermoid cysts. Treatment choices are made after clinical examination and, where needed, further testing, and are discussed with the patient in light of the diagnosis, the extent of the condition and previous treatments.

Dermatomyositis Acne treatment Excessive sweating treatment
Botulinum toxin treatment Dermoid cyst

CONDITIONS TREATED

Dermatomyositis Excessive sweating treatment Dermoid cyst
Genital herpes Urticaria
