CLINICAL FOCUS

A large part of Dr. Özçelik's practice concerns headache disorders. She assesses and manages migraine and other primary headaches, applies migraine treatment protocols and performs nerve blocks where clinically appropriate.

Her second area of focus is cognitive and movement disorders associated with aging, including dementia, Alzheimer's disease and Parkinson's disease. She additionally sees patients with sleep disorders such as insomnia and sleep apnea, patients with balance-related symptoms such as vertigo, and patients whose care involves type 1 and type...
