DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

The practice of Dr. Baş concentrates on two areas listed in his profile: general dental care and preventive dental care. General dental care involves evaluating a patient's overall oral and dental condition, discussing findings and considering appropriate next steps within the Dental & Oral Health unit.

Preventive dental care is directed at helping patients maintain their oral health over time and at identifying concerns at an early stage, when they may be more straightforward to address. In this part of his work, Dr. Baş assesses the current state of the teeth and surrounding tissues and discusses with the patient how their oral health can be supported.

General dental care

Preventive dental care

INTERNATIONAL PATIENTS

Dr. Baş consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and dental imaging, arranges appointments and organizes the hospital visit at either of his two İstanbul locations.

CONDITIONS TREATED

General dental care

Preventive dental care
