DEPARTMENT
Nuclear Medicine

CLINICAL FOCUS

Dr. Akkaya's practice centers on nuclear medicine imaging methods that use small amounts of radioactive tracers to show how organs and tissues are functioning. PET imaging and SPECT imaging are used to assess metabolic and functional activity in the body and are often reviewed alongside other imaging such as CT or MRI.

In addition to diagnostic imaging, Dr. Akkaya provides radioiodine treatment, a form of nuclear medicine therapy in which radioactive iodine is administered for certain thyroid conditions. Whether a particular imaging study or treatment is appropriate depends on the individual patient's clinical situation, prior test results and the...
