Ophthalmology

CLINICAL FOCUS

A large part of Dr. Çakır's practice concerns conditions that affect vision in adults. He assesses and manages glaucoma, cataract and retinal diseases, and carries out smart lens procedures for patients in whom lens replacement is being considered.

Dr. Çakır also treats disorders of the eyelids and the ocular surface, including blepharitis, ptosis, eyelid myokymia and eye allergies. In children, his work includes paediatric eye diseases and amblyopia, where early assessment and follow-up are an important part of care.

Astigmatism

Blepharitis

Paediatric eye diseases

Eye allergies

INTERNATIONAL PATIENTS

Dr. Çakır consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit in Bodrum.
