CLINICAL FOCUS

The core of Dr. Kuybulu's practice is prosthetic dental treatment: the assessment, planning and provision of dental prosthetics that restore or replace damaged or missing teeth. Treatment planning is a central part of this work.

His published work reflects the areas he has studied clinically. These include the clinical success of crowns made with all-ceramic systems, the use of all-ceramic restorations to splint periodontally compromised teeth, a prospective clinical study of ceromer inlays followed for up to 53 months, porcelain onlay restorations, and the methodology of fracture tests for fixed...

INTERNATIONAL PATIENTS

Dr. Kuybulu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, panoramic or CT reports, records of previous dental work, laboratory results and discharge summaries,...
