HOSPITAL

Acibadem Maslak Hospital, İstanbul

DEPARTMENT

Varicose Vein Treatment

CLINICAL FOCUS

The core of Dr. Özker's clinical work is the assessment and treatment of varicose veins and other venous conditions within the field of phlebology. His expertise extends to vascular surgery and endovascular surgery, in which vascular problems are approached through minimally invasive, catheter-based techniques where appropriate.

Wound care is a further area of his practice, including the evaluation of chronic wounds in which an underlying vascular cause may need to be identified and addressed. His background in cardiovascular surgery informs his approach to circulatory conditions more broadly.
