HOSPITAL

Acibadem Atasehir Hospital, İstanbul

DEPARTMENT

Physical Medicine & Rehabilitation

CLINICAL FOCUS

Dr. Hayta's clinical work centers on spine health and on rehabilitation-based pain management. He uses manual medicine and manual therapy as part of his approach, alongside other physical medicine methods, and assesses how pain and spinal problems affect a patient's daily function.

A further area of his practice is chronic muscle pain, including fibromyalgia, myalgia and muscle rheumatism. For these conditions, evaluation typically involves a careful review of symptoms, previous investigations and earlier treatments before any rehabilitation or pain management plan is discussed.
