Orthopedics & Joint Center

CLINICAL FOCUS

A central part of Dr. Kanay's practice is joint replacement. He performs hip replacement surgery and knee replacement surgery, and his published work includes studies on complications after total knee arthroplasty, including periprosthetic joint infection and early postoperative pain.

His second area is orthopedic oncology. Dr. Kanay evaluates and surgically treats bone tumors and soft tissue sarcomas, a field in which he completed a dedicated clinical fellowship in Milano.
