DEPARTMENT
Radiology

CLINICAL FOCUS

Dr. Karaarslan's clinical work centers on diagnostic imaging. His areas of expertise include magnetic resonance imaging (MRI), computed tomography (CT) and tomography. Within CT, he has a particular interest in CT colonography, also referred to as virtual colonoscopy, and in virtual angiography, both of which are cross-sectional imaging...

Imaging results are interpreted in the context of the patient's history and the clinical question raised by the referring physician, and findings are reported so that they can be used by the treating team. General information on coronary CT angiography and PET-CT imaging is available on this site.
