## CLINICAL FOCUS

A large part of Dr. Paşaoğlu's work concerns the anterior segment of the eye and refractive conditions. He evaluates and treats cataract, and his practice includes smart lenses, which are discussed with patients according to their individual eye findings and visual needs.

His second area of focus is oculoplastic surgery, which addresses the eyelids, the tear drainage system and the eye socket. This includes blepharoplasty, surgery for ptosis (drooping eyelids), treatment of tear duct obstruction in infants and adults, and ocular prosthesis surgery.
