CLINICAL FOCUS

Dr. Elemen's clinical work centers on surgical conditions of childhood, with a particular interest in digestive system diseases and surgery. He evaluates and treats appendicitis in children, umbilical hernia in children and other childhood hernias. His areas of expertise also include undescended testicles and circumcision.

He additionally has expertise in the surgical management of Wilms tumor and in torticollis. Each child is assessed individually, taking into account age, clinical findings and existing reports, and the suitability, timing and type of any procedure are discussed with the family before decisions are made.
