CLINICAL FOCUS

Dr. Kaplan's work centers on the assessment and management of patients who present with urgent medical concerns. In an emergency setting, the initial evaluation is directed at understanding the presenting complaint, identifying conditions that may require immediate attention, and deciding on the next appropriate steps in care.

Emergency care is by nature broad, and the approach depends on the individual patient and the reason for presentation. Dr. Kaplan's role is to evaluate the situation, provide the care that is appropriate within the Emergency Service, and coordinate any further assessment or referral to other specialties that may be needed.

INTERNATIONAL PATIENTS

Dr. Kaplan speaks Turkish and English, and interpreters can be arranged for patients who prefer to communicate in another language. For international patients, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries.
