DEPARTMENT
Cardiology Department

CLINICAL FOCUS

A large part of Dr. Seyfeli's work concerns coronary artery disease and its consequences. He evaluates patients with atherosclerosis, angina and myocardial infarction, and performs percutaneous coronary intervention where this is considered appropriate.

In the field of valve and structural heart disease, Dr. Seyfeli sees patients with aortic valve stenosis and other heart valve diseases, as well as atrial septal defect (ASD). For selected patients with aortic valve stenosis, he performs transcatheter aortic valve implantation (TAVI), a catheter-based procedure.

Aortic valve stenosis

Atrial septal defect (ASD)

Heart valve diseases

Cardiac pacemaker

Heart failure

CONDITIONS TREATED

Aortic valve stenosis

Atrial septal defect (ASD)

Heart valve diseases

Heart failure

Coronary artery disease
