Hospital, İstanbul

DEPARTMENT
Cardiology Department

CLINICAL FOCUS

The Coronary Intensive Care Unit cares for patients whose cardiac condition calls for continuous observation and rapid response. Within this setting, Dr. Kelebek's areas of expertise include arrhythmias, in which the heart's rhythm is abnormally fast, slow or irregular, and emergency interventions for patients whose condition changes...

Blood pressure disorders form a further part of his practice. He assesses and monitors both high blood pressure and low blood pressure, and he uses ambulatory blood pressure monitoring, in which a portable device records blood pressure at intervals over an extended period during normal daily activity.

Arrhythmias Trauma care Emergency interventions
Ambulatory blood pressure monitoring Low blood pressure

CONDITIONS TREATED

Arrhythmias Emergency interventions
Ambulatory blood pressure monitoring Low blood pressure
High blood pressure
