CLINICAL FOCUS

A central part of Dr. Kaba's practice is robotic thoracic surgery, alongside single-port VATS (video-assisted thoracoscopic surgery). These minimally invasive approaches are used for selected patients;

Dr. Kaba treats lung cancer and other thoracic cancers, including chest wall tumors and tumors of the mediastinum. His work also covers pneumothorax, diaphragm disorders, and chest wall deformities such as pectus excavatum and pectus carinatum.
