CLINICAL FOCUS

A central part of Dr. Akoğlu's practice is the surgical management of head and neck cancers, including oral cancer, tongue and tongue base cancer, and laryngeal cancer. Evaluation of these conditions generally involves a clinical examination, review of imaging, and, where appropriate, tissue sampling before a treatment plan is discussed.

He also treats a range of general ear, nose and throat conditions. In the ear and hearing field, his areas of expertise include hearing loss in children, cochlear implants, and vertigo and balance disorders. In the throat and upper airway, he manages pharyngitis, adenoid conditions, and tonsillectomy.
