CLINICAL FOCUS

Dr. Uyar's areas of expertise cover several imaging modalities that are used to evaluate a wide range of conditions. In breast imaging, she works with mammography and ultrasonographic imaging, which are commonly used to examine breast tissue, to follow up findings and to support the diagnosis of breast diseases.

Her expertise also includes tomography and virtual angiography, a non-invasive approach to visualizing blood vessels based on cross-sectional imaging. In radiology, the interpretation of images is combined with the referring physician's findings and the patient's symptoms, and results are reported so that the treating team can decide on...
