FOCUS
Scintigraphy · PET (Positron Emission...)

HOSPITAL
Acibadem Atasehir Hospital, İstanbul

DEPARTMENT
Nuclear Medicine

CLINICAL FOCUS

Dr. Abamor's clinical work centers on nuclear medicine imaging. Her areas of expertise include scintigraphy, PET (Positron Emission Tomography), myocardial perfusion scintigraphy and SPECT (Single-Photon Emission Computed Tomography).

Scintigraphy and SPECT produce planar and three-dimensional images of tracer distribution in the body, while PET is a further functional imaging technique used in a range of clinical settings. Myocardial perfusion scintigraphy is a nuclear imaging study of blood flow to the heart muscle.
