CLINICAL FOCUS

A central part of Dr. Yapıcı's work is the care of premature infants. Babies born early may need support for breathing, feeding, temperature regulation and growth, and their care in the intensive care unit is adjusted as they mature.

Dr. Yapıcı also treats newborns with hypoxic-ischaemic encephalopathy (HIE), a condition in which the brain has been affected by reduced oxygen or blood flow around the time of birth. Care for these infants involves close neurological observation and supportive treatment in the intensive care unit.

Bronchopulmonary dysplasia (BPD)

Hypoxic-ischaemic encephalopathy (HIE)

Respiratory distress syndrome (RDS)

Prematurity

Phototherapy

INTERNATIONAL PATIENTS

Dr. Yapıcı consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound or MRI reports, laboratory results and discharge summaries, and arranges appointments and...
