Pathology Department

CLINICAL FOCUS

Dr. Akar's areas of expertise are tissue pathology, cytopathology and pathology laboratory practice. In tissue pathology, she examines biopsy and surgical specimens under the microscope to characterize disease processes and to provide the diagnostic information that surgeons, oncologists and other clinicians rely on when planning...

Her experience in pathology laboratory practice, including her role in establishing a pathology laboratory earlier in her career, supports the organization and quality of the laboratory process from specimen handling to reporting. As a pathologist, Dr. Akar does not usually treat patients directly;
