Dental & Oral Health

CLINICAL FOCUS

Dr. Türsen's practice covers a range of prosthetic and restorative needs. For patients who have lost some or all of their teeth, she assesses and plans implant-supported prostheses, including All-on-Four and All-on-Six treatment, as well as crowns and bridges and removable dentures.

Beyond prosthetic work, Dr. Türsen evaluates gum concerns such as gingivitis and gum recession, as well as bad breath, which can have a number of oral causes and is assessed in the context of the overall dental examination. She also sees patients with temporomandibular joint disorders, where symptoms affecting the jaw joint are examined alongside the bite and any existing dental work.

Gingivitis

Gum recession

Dental fillings

Bad breath

Damaged teeth

INTERNATIONAL PATIENTS

Dr. Türsen consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT scans, laboratory results and records of previous dental treatment, and arranges appointments and the hospital visit itself.
