CLINICAL FOCUS

Dr. Tepençelik's clinical focus is anesthesiology and reanimation. In her anesthesiology role, she is involved in the care of patients before and during medical and surgical procedures. This includes communicating with the patient about the anesthesiology aspects of their care ahead of the procedure and coordinating with the relevant clinical team so that the anesthesia plan is aligned with the planned procedure and the...

Reanimation is the second area of her specialty and forms part of the name of the unit in which she works. Her specialty training at İstanbul University İstanbul Faculty of Medicine covered both anesthesiology and reanimation. Questions about how anesthesia care will be organized for a specific procedure are generally addressed together with the treating team, and the appropriate approach is decided on a case-by-case basis...
