CLINICAL FOCUS

The clinical work of Dr. Havas centers on intensive care treatment, that is, the assessment and treatment of critically ill patients who require close monitoring and organ support in an intensive care setting.

Dr. Havas also has expertise in palliative care, which addresses the comfort, symptom control, and supportive needs of patients with serious or advanced illness. In the intensive care context this involves careful discussion with patients and their families about goals of care and the options that are appropriate at each stage.
