Pediatrics

CLINICAL FOCUS

A central part of Dr. Kangarlı's work is well-child follow-up, in which growth, development, and general health are reviewed at regular intervals and families receive guidance on preventive child health. In the newborn period she provides newborn follow-up, coordinates newborn screening tests, and treats newborn jaundice.

Dr. Kangarlı also diagnoses and treats pediatric infectious diseases and upper respiratory tract illnesses in children, including croup. Her approach is to take a careful history, examine the child in an age-appropriate way, and use investigations where clinically indicated, so that treatment can be matched to the individual patient.

Child and adolescent health Well-child follow-up Infant colic
Croup Pediatric infectious disease diagnosis and treatment

INTERNATIONAL PATIENTS

Dr. Kangarlı consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory and pathology results, ultrasound or X-ray reports, previous newborn screening results, operative notes, and discharge summaries, and it...
