İstanbul

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

A central part of Dr. Buyru's work is the management of endometriosis, including the treatment of ovarian endometrioma. He evaluates and treats menstrual irregularities and polycystic ovary syndrome, and he provides infertility treatment within the reproductive medicine setting. His gynecological practice also includes hysterectomy and the diagnosis and management of ectopic pregnancy.

In obstetrics, Dr. Buyru provides pregnancy follow-up through to delivery, and his practice covers epidural delivery, cesarean delivery and water birth. He also offers menopause care, including the assessment of symptoms and a discussion of the available options.

Endometriosis treatment

Ovarian endometrioma treatment

Menstrual irregularities

Menopause care

Ectopic pregnancy

INTERNATIONAL PATIENTS

Dr. Buyru consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments and organizes the hospital visit.
