Surgery

CLINICAL FOCUS

A significant part of Dr. Kaya's practice is obesity surgery, including gastric bypass and sleeve gastrectomy. Whether a bariatric procedure is appropriate, and which one, depends on the individual patient's medical history and is discussed during the consultation.

In colorectal and anorectal surgery, Dr. Kaya treats conditions such as anal fissure and hemorrhoids, and his practice extends to colorectal surgery more broadly, as well as pelvic pain treatment. He performs hernia surgery, gallbladder surgery and pancreatic, liver and biliary surgery.
